

Notes to self

- . Exploring the Switch control
 - . Allows you to turn things on and off
 - . Show it in different styles for the best experience.

Switch

Switch

```
Column {  
    Switch{  
        text : "WiFi"; checked: true  
        onCheckedChanged: {  
            if (checked){  
                console.log("WiFi switch is turned ON")  
            }else{  
                console.log("WiFi switch is turned OFF")  
            }  
        }  
    }  
    Switch{...}  
    Switch{  
        text : "NFC"; enabled: false  
    }  
}
```

CMake

```
find_package(Qt6 6.2 COMPONENTS Quick QuickControls2 REQUIRED)
...
target_link_libraries(app2-Button
    PRIVATE Qt6::Quick Qt6::QuickControls2)
```
