

Notes to self

- . Used to select folders
- . Use the doc and improvise

FolderDialog

FolderDialog

```
Column {
    Button{
        onClicked: {
            folderDialogId.open()
        }
    }
    Text {
        id : textId
        text : "Use hasn't chosen yet"
    }

    FolderDialog{
        id : folderDialogId
        onAccepted: {
            textId.text = selectedFolder
        }
        onRejected: {
            textId.text = "Dialog rejected"
        }
    }
}
```

CMake

```
find_package(Qt6 6.2 COMPONENTS Quick QuickControls2 REQUIRED)
...
target_link_libraries(app2-Button
    PRIVATE Qt6::Quick Qt6::QuickControls2)
```
