

QML Button

```
RowLayout {  
    anchors.left: parent.left  
    anchors.right: parent.right  
  
    Button {  
        id : button1  
        text: "Button1"  
        Layout.fillWidth: true  
        onClicked: {  
            console.log("Clicked on button1")  
        }  
        onDoubleClicked: {  
            console.log("Double clicked on button1")  
        }  
    }  
}
```

Styles

```
//Load our style
QQuickStyle::setStyle("Material");
//QQuickStyle::setStyle("Universal");
//QQuickStyle::setStyle("Fusion");
//QQuickStyle::setStyle("Imagine");
//QQuickStyle::setStyle("Default");
```

CMake

```
find_package(Qt6 6.2 COMPONENTS Quick QuickControls2 REQUIRED)
...
target_link_libraries(app2-Button
    PRIVATE Qt6::Quick Qt6::QuickControls2)
```
