# Notes to self

```
. Exploring the Dial control
. Show the wrap property.
```

Dial

DelayButton

```qml
Dial{
    anchors.horizontalCenter: parent.horizontalCenter
    from: 1
    to : 100
    value: 50
    //wrap: true

    onValueChanged: {
        console.log(" Current value : " + Math.ceil(value))
    }

}
```

CMake

```
find_package(Qt6 6.2 COMPONENTS Quick QuickControls2 REQUIRED)
...
target_link_libraries(app2-Button
    PRIVATE Qt6::Quick Qt6::QuickControls2)
```
