Notes to self
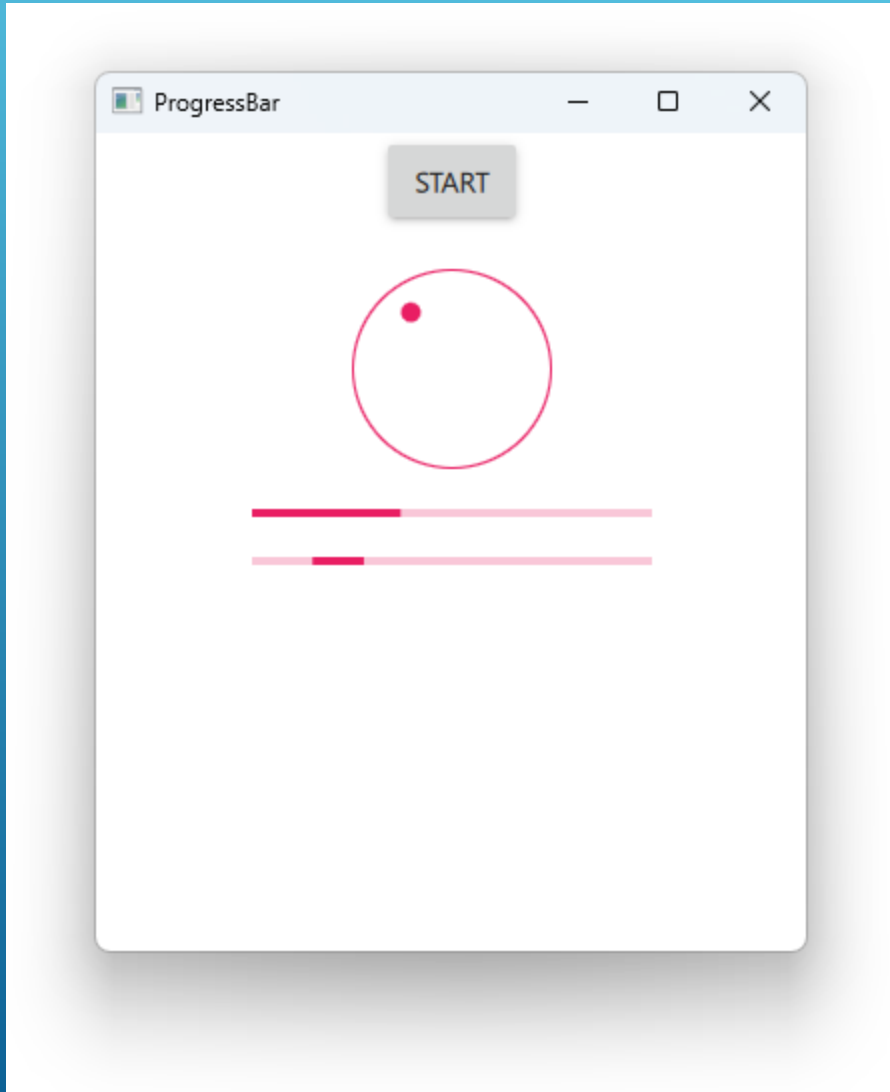

```
. Exploring ProgressbAR
    . The usual thing
    . The styles show up bad on Windows11 by default
        . We try Universal and Material to show how they look on
            mobile and embedded devices

. Improvise on the rest
```

ProgressBar

ProgressBar getting values from Dial

```qml
Dial {
    id : dialId
    from : 1;to : 100
    value : 40
    onValueChanged: {
        progressBarId.value = value
    }
}

ProgressBar {
    id : progressBarId
    from : 1;to : 100
    value : 40
}
```

Indeterminate ProgressBar

```qml
ProgressBar {
    id : progressBarId1
    indeterminate: true
}
```

CMake

```
find_package(Qt6 6.2 COMPONENTS Quick QuickControls2 REQUIRED)
...
target_link_libraries(app2-Button
    PRIVATE Qt6::Quick Qt6::QuickControls2)
```
